

thirsty light™ DIGITAL

The Thirsty Light Digital™ featuring Drypoint Technology is a convenient moisture sensor that continuously monitors the moisture level of a potted plant. Thirsty Light™ features a blinking LED which alerts the user when the soil is dry and the plant is thirsty. The speed of the blink intuitively increases as the soil gets dryer, with 5 levels of sensitivity. With the Thirsty Light™ Digital, you'll never have to guess when your plants need watering.

Drypoint™ technology

Specifications:

- Frequency of testing: once per second
- Moisture levels: 5

Blinking patterns:

1. No blink: moisture detected
 2. Slow blink: Starting to get dry
 3. Medium blink: Dry
 4. Fast blink: Very dry
 5. Double blink w/pause: Completely dry/Standby
- Low battery voltage mode: Slow triple blink
 - Battery life: Depends on how much the light is allowed to blink.
 - Optimal battery life is 12 months.

Features:

- Watering Guide included with each unit
- Drypoint Digital Circuit
- Long-lasting LED
- Corrosion resistant Brass Probe
- 2 replaceable 1.5V Lithium batteries
- ABS plastic casing
- On/Off switch
